

PROFESSIONAL SUMMARY

Systems-oriented Engineering Leader & Venture Founder with a 12+ year track record of scaling global technical organizations from 0 to 1 across Asia, Australia, and the Americas. Expert in transforming legacy technical debt into high-availability enterprise stacks and bridging the gap between **MIT-tier research and commercial viability**. A strategic architect of **socially responsible technology**, I have led the development of complex platforms for **renewable energy, carbon tracking, and urban mobility**. Proven success in securing **\$250k+ in non-dilutive innovation funding** and building high-retention, cross-functional cultures that align engineering excellence with meaningful environmental and social impact.
